Autoclear® Plus HS HSR

FOR PROFESSIONAL USE ONLY

Description

High-build, two-pack clearcoat designed for universal application and optimal appearance in Autobase Plus 2-and 3 coat systems. Autoclear Plus HS HSR shows excellent flow, gloss and optimum scratch resistance.

Product and additives

Autoclear Plus HS

Hardener

P25 Hardener; spot and panel repairs at 20°C-30°C
P35 Hardener; larger areas and overall refinishing at 20°C-40°C

Plus Reducers

Plus Reducer Fast; spot and panel repairs, temperature range: 15°C-25°C.
Plus Reducer Medium; spot and panel repairs and large areas, temperature range: 20°C-30°C.
Plus Reducer Slow; larger areas and complete paint jobs, temperature range: 25°C-35°C.
Plus Reducer Extra Slow; to use in extremely hot temperatures, temperature range: above 35°C.

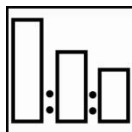

Basic raw materials

Autoclear Plus HS: Acrylic and polyester resins
P Hardener: Poly-isocyanate resins

Suitable substrates

Autobase Plus; after a minimum flash off time of 15 minutes at 20°C

Mixing

P25 Hardener

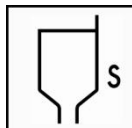

100 Autoclear Plus HS
100 P25 Hardener
10% Plus Reducers

P35 Hardener

100 Autoclear Plus HS
100 P35 Hardener
10% Plus Reducers

For a more optimum sprayability and flow is desired an additional 10% Plus Reducer may be added.

Viscosity

15-17 seconds – DIN Cup 4 at 20°C.

Spray gun set-up / application pressure

Spray gun
Gravity feed

Fluid tip – set-up
1.2-1.4 mm

Application pressure
1.7-2.2 bar at the spray gun air inlet
HVLP max 0.6-0.7 bar at the air cap

Autoclear® Plus HS HSR

FOR PROFESSIONAL USE ONLY

Application process & blending

Apply a medium closed coat, allowing for a 5-8 minutes flash-off time at 20°C.

Next, apply a full coat, allowing for a 5-10 minutes flash-off time at 20°C before baking.

- Flash-off between coats; in case of application to larger areas, flash off between coats is minimal.
- Recoatable with itself after full drying cycle, sanding becomes necessary after 24 hours
- For blending (spot repair and panel blends), see TDS S8.01.01
- *When sanding and heavy polishing is required, a third coat may be applied after the stated flash-off times at 20°C.*

Pot-life

P25 Hardener

5 hours at 20°C

2 ½ hours at 35°C

P35 Hardener

6 hours at 20°C

4 ½ hours at 35°C

Film thickness

By using the recommended application: 60-80 µm.

Drying times

Allow for a minimum of 10 minutes flash-off time at 20°C before moving the car into a pre-heated drying oven (booth) at 60°C. All drying times relate to standard application and object temperature.

Consider the time required for the spraybooth to reach an acceptable air temperature to enable the heat transfer of 60°C to the object

P25 Hardener

P35 Hardener

20°C	Dust dry	1 ¼ hour		2½ hour
	Dry to handle*	3 ½ hours		7 hours
60°C	Dust dry	10 minutes		15 minutes
	Dry to handle*	40 minutes		45 minutes
	Hard dry	50 minutes		60 minutes

Complete through hardening of the clearcoat will be realized after approximately 2 weeks at 20°C

**Take precaution in cases of washing or cleaning the clearcoat surface within this time period.*

Dry to handle after approximately 10 minutes.

Allow 5 minutes flash off prior to infra red curing

The panel must not reach a temperature above 100°C while curing.

For additional infra red drying information; see TDS S9.01.01

Autoclear® Plus HS HSR

FOR PROFESSIONAL USE ONLY

Polishability

Dust and minor imperfections can be polished out after the stated air-dry times have been reached, or after a full bake at 60°C object temperature, followed by a cool down of the object to ambient temperature. Carefully sand out dust particles and restore the surface according polishing recommendations.
Ready to polish approximately 1 hour after cool down to ambient temperature, preferably within 48 hours.

Material usage

By using the recommended application, the theoretical material usage is $\pm 4,7 \text{ m}^2/\text{liter}$ RTS mixture.
The practical material usage depends on many factors i.e. shape of the object, roughness of the surface, application techniques, pressure and application circumstances.

Cleaning of equipment

Sikkens Solvents or solvent borne guncleaners

VOC

The VOC content of this product in ready to use form is 550 g/liter RTS mixture.

Product storage

Product shelf-life is determined when products are stored unopened at 20°C.
Avoid extreme temperature fluctuation.

- o *Product shelf life data see TDS S9.01.02*
