

Autoclear Expert HS - HSR

FOR PROFESSIONAL USE ONLY

Description

Sikkens Autoclear Expert HS - HSR is two component clearcoat system provides excellent flow, gloss and smooth finish. It is easy to apply and suitable for all types of repairs, in most application conditions. Autoclear Expert HS - HSR shows excellent flow, gloss and optimum scratch resistance.

P Series Hardeners / Plus Reducers

100 Autoclear Expert HS - HSR
100 P Hardeners – P25 / P35
0-10 Plus Reducers

Use any applicable Sikkens measuring stick

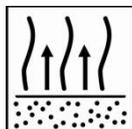

Spray gun set-up:
1.3-1.4mm

Application pressure:
1.7-2.0 bar at the air inlet
HVLP max 0.6-0.7 bar at the air cap

2 x 1 coat
First apply a medium closed coat, next apply a full coat after indicated flash off time

Between coats
5 –10 minutes at 25°C
Reducer selection according temperature

Before curing
10-15 minutes at 25°C
Flash-off time depending on oven type

Product selection
P25 / Plus Reducer Medium
P35 / Plus Reducer Slow

	25°C	60°C
P25 / Plus Reducer Medium	135 minutes	35 minutes
P35 / Plus Reducer Slow	180 minutes	43 minutes

Use suitable respiratory protection
Akzo Nobel Car Refinishes recommends the use of a fresh air supply respirator.

Autoclear Expert HS - HSR

FOR PROFESSIONAL USE ONLY**Description**

Sikkens Autoclear Expert HS - HSR is two component clearcoat system provides excellent flow, gloss and smooth finish. It is easy to apply and suitable for all types of repairs, in most application conditions. Autoclear Expert HS - HSR shows excellent flow, gloss and optimum scratch resistance.

Product and additives

Autoclear Expert HS

Hardener P25 Hardener; spot, panel and larger repairs at 20°C- 30°C
P35 Hardener; spot, panel and larger repairs at 25°C-40°C

Plus Reducers Plus Reducer Fast; spot and panel repairs at 15°C-20°C
Plus Reducer Medium; spot and panel repairs and large areas at 15°C- 40°C
Plus Reducer Slow; larger areas and complete paint jobs at 15°C- 40°C
Plus Reducer Extra Slow; hot temperatures at 25°C - 40°C

Xpress Dry Reducer Xpress Dry Reducer; spot and panel repairs, temperature range: 15°C-25°C.

Additives NA

Basic raw materials

Basic Clear: Acrylic and polyester resins

P Hardener: Poly-isocyanate resins

Plus Reducers – A blend of organic solvents

Xpress Dry Reducer: A blend of organic solvents, additives and catalysts

Suitable substrates

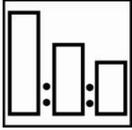

Autobase Plus; after a minimum flash off time of 15 minutes at 25°C

Autowave 2.0: until completely matt and dry

Autoclear Expert HS - HSR

FOR PROFESSIONAL USE ONLY

Mixing

Standard systems

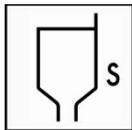

100 Autoclear Expert HS - HSR
100 P Hardeners
0-10 Plus Reducers

Accelerated system

100 Autoclear Expert HS - HSR
100 P25 Hardener
10 Xpress Dry Reducer

Use any applicable Sikkens measuring stick

Viscosity

14-16 seconds – DIN Cup 4 at 25°C.

Spray gun set-up / application pressure

Spray gun
Gravity feed

Fluid tip – set-up
1.3-1.4 mm

Application pressure
1.7-2.0 bar at the spray gun air inlet
HVLP max 0.6-0.7 bar at the air cap

Application process & blending

Apply a medium closed coat, allowing for a 5-10 minutes flash-off time at 25°C.
Next, apply a full coat, allowing for a 10-15 minutes flash-off time at 25°C before baking.
Flash-off between coats; in case of application to larger areas, flash off between coats is minimal.
Recoat-able with itself after full drying cycle, sanding becomes necessary after 24 hours
For blending (spot repair and panel blends), see TDS S8.01.01.
When sanding and heavy polishing is required, a third coat may be applied after the stated flash-off times at 25°C.

Pot-life

P25 Hardener	3 hours	at 25°C
P35 Hardener	3 hours	at 25°C
P25 Hardener with Xpress Dry Reducer	1 hour	at 25°C

Film thickness

By using the recommended application: 50-60µm

Autoclear Expert HS - HSR

FOR PROFESSIONAL USE ONLY

Drying times

Allow for a minimum of 10 minutes flash off time at 20°C - 30°C before moving the car into a pre-heated drying oven (booth) at 60°C. All drying times relate to standard application and object temperature. Consider the time required for the spray booth to reach an acceptable air temperature to enable the heat transfer of 60°C to the object.

		P25 / Xpress Dry Reducer	P25 / Plus Reducer Med	P35 /Plus Reducer Slow
15°C	Dust dry	40 minutes	60 minutes	170 minutes
	Dry to handle*	110 minutes	180 minutes	285 minutes
25°C	Dust dry	30 minutes	55 minutes	80 minutes
	Dry to handle*	70 minutes	135 minutes	180 minutes
35°C	Dust dry	23 minutes	40 minutes	75 minutes
	Dry to handle*	60 minutes	95 minutes	135 minutes
60°C	Dust dry	10 minutes	25 minutes	30 minutes
	Dry to handle*	20 minutes	35 minutes	43 minutes

Complete through hardening of the clearcoat will be realized after approximately 2 weeks at 20°C
 *Take precaution in cases of washing or cleaning the clearcoat surface within this time period.

*Dry to handle; Following the drying cycle at 60°C object temperature, allow the Autoclear Expert HS - HSR to cool down fully to ambient temperature. Dry to handle after approximately 10 minutes.

Allow 5 minutes flash off prior to infra-red curing
 The panel must not reach a temperature above 100°C while curing.
 For additional infra-red drying information; see TDS S9.01.01

Polishability

Dust and minor imperfections can be polished out after the stated air-dry times have been reached, or after a full bake at 60°C object temperature, followed by a cool down of the object to ambient temperature. Carefully sand out dust particles and restore the surface according polishing recommendations. Ready to polish approximately 30 minutes after cool-down to ambient temperature.

Polish within 24 hours to ensure ease of polishing

Autoclear Expert HS - HSR

FOR PROFESSIONAL USE ONLY**Theoretical coverage**

By using the recommended application, the theoretical material usage is ± 7 m²/liter RTS mixture.

The theoretical material usage at 1 μ m dry film thickness is: 363 - 389 m²/liter

The practical material usage depends on many factors i.e. shape of the object, roughness of the surface, application techniques, pressure and application circumstances.

Cleaning of equipment

Sikkens Solvents or solvent borne Gun cleaners

VOC

The VOC content of this product in ready to use form is 551 - 567 g/liter RTS mixture.

Product storage

Product shelf-life is determined when products are stored unopened at 20°C.

Avoid extreme temperature fluctuation.

Product shelf life data see TDS S9.01.02
